SHIPNET

Shipnet Procurement

Procurement Management Solution - Supply Chain

Fact Sheet

Shipnet Procurement
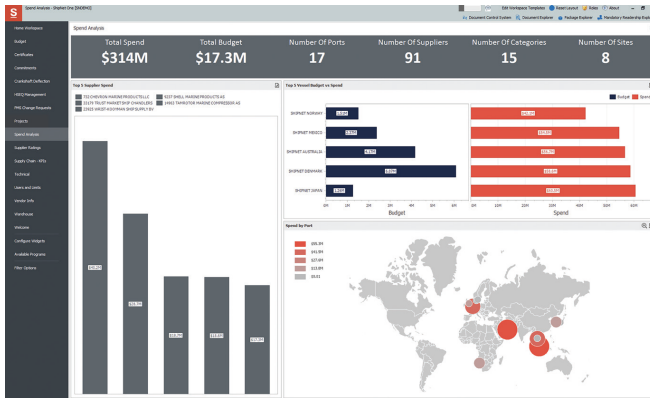

Procurement Management Solution

Supply chain process - from items being ordered to receipt and invoicing.

Shipnet's Procurement Management Solution allows you to make informed decisions to optimize your spending. The solution provides a complete Ship-to-Shore procurement tool including defined workflows, budget validation, price comparison, and on-board shopping utility - as well as Logistics and Warehouse management. Data and information from Procurement is shared in other Shipnet ONE solutions.

End-to-end transparency

Procurement allows full logistic control to effortlessly sync with ledgers, budgets, and finance departments.

Whether goods are going from suppliers to vessels, or consolidated shipments from the warehouse, you have full control. Unlike other standalone solutions, Procurement touches nearly every department, including CPOs, Technical Managers, Purchasers, Warehouse Managers, Technical Superintendent and seafarers - providing full transparency at every stage of the ordering process.

Why Shipnet Procurement?

- User defined workflows that enables correct process on ship as well as shore
- Tasks are pushed to the users through alerts and task manager
- Common user interface and database on ship and shore
- Enhanced security through role-based user management
- Integrated with the Shipnet ONE Planned Maintenance System
- Supplier pricelist lookup functionality within Shipnet ONE
- Make informed decisions with smart price evaluation process
- Enhanced supplier evaluation
- Deep integration to ShipServ
- Multi-tab desktop layout enables several concurrent tasks
- Optimise resource utilisation with Mobile PO approval
- Dynamic budget validation both on ship and shore
- Integrated Logistics and Warehouse modules on Windows and Web platforms

Some of the benefits

1. **Efficient integration**

   Perfect alignment between Technical and Financial for improved integration at every touch point.

2. **Compliance built in**

   Efficient approval hierarchies and four-eye approvals with complete auditability, designed for streamlined compliance.

3. **SNAPS Web**

   Simple web forms can be accessed via the portal, for better communication and electronic quotations with suppliers.

4. **Inter-departmental workflows**

   Configurable to match your business workflows, to make sure individual tasks can be tracked from A – B.

Centralised data

All vital data, from maintenance-related consumption to warehouse packages, is held centrally, simplifying meaningful decisions.

All-in-one solution

Our end-to-end cycle brings every stage of procurement together – from sourcing, to logistics, to invoicing.
